

Ownible - RWA Platform on Chiliz

Introduction

Ownible is a decentralized platform for Real World Assets (RWA) on the Chiliz Chain, focused on sports and cultural collectibles.

Our mission is to empower fans to invest in, collect, and interact with tokenized real-world assets such as music rights, sports memorabilia, or exclusive event access.

Problem

Today, fans have no simple or verifiable way to own a piece of the moments, talents, or experiences they support. Collectibles and experiences are centralized, inaccessible, and illiquid.

Ownible solves this by fractionalizing assets into verifiable, tradable tokens that retain a direct connection to their real-world value.

Our Solution

Each asset (collectible item, VIP access, copyright, etc.) is represented by an ERC-1155 token on the Chiliz Chain.

This token includes:

- an IPFS link to metadata,
- compliance attributes (lockup, KYC...),
- a fractional ownership percentage.

Users can buy, resell, or collect these fragments directly through their CHZ wallet.

Core Features

Ownible - RWA Platform on Chiliz

Immersive, gamified interface (marketplace, lobbies, portfolio).

Categories: E-Sport, Sports, Music, Real Estate.

Token fragment mechanics (1/1000, 1/500...).

Performance indicators (% change, popularity).

Full WalletConnect integration (native CHZ support).

Use Cases

Purchase 2% of a rare Daft Punk vinyl.

Own a fragment of a VIP box for a Champions League match.

Invest in an e-sports trophy tied to your favorite player (ZywOo).

Resell shares on the secondary market or receive fan rewards.

Roadmap

MVP on testnet (marketplace + token fragments)

Fan reputation system (FanTrust)

Collectible mascot drops (Spicy NFTs)

Launch of RWA-compliant smart contracts

Oracle integration for real-time asset valuation

Conclusion

Ownible bridges the gap between fan passion and real-world asset investment using Chiliz technology.

Join the new era of decentralized ownership in sports and entertainment.
